**1.3 User Entered Comments & Non-Default Data**

Project Characteristics -

Land Use - Phase 1 construction area is approximately 1.8 acres.

Construction Phase - Construction schedule per Schematic Design Submittal (November 2021).

Grading - Assumed up to 5,000 cy soil export.

Demolition -

Architectural Coating - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Vehicle Trips - Construction only.

Construction Off-road Equipment Mitigation - Per SCAQMD Rule 403 Fugitive Dust requirements.

Area Mitigation - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Sunny Sands Construction - Phase 1 - Riverside-Salton Sea County, Summer

**1.3 User Entered Comments & Non-Default Data**

Project Characteristics -

Land Use - Phase 1 construction area is approximately 1.8 acres.

Construction Phase - Construction schedule per Schematic Design Submittal (November 2021).

Grading - Assumed up to 5,000 cy soil export.

Demolition -

Architectural Coating - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Vehicle Trips - Construction only.

Construction Off-road Equipment Mitigation - Per SCAQMD Rule 403 Fugitive Dust requirements.

Area Mitigation - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Sunny Sands Construction - Phase 1 - Riverside-Salton Sea County, Winter

**1.3 User Entered Comments & Non-Default Data**

Project Characteristics -

Land Use - Phase 2-3 construction area is approximately 2.6 acres.

Construction Phase - Construction schedule per Schematic Design Submittal (November 2021).

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment - Limited equipment for MPR renovation.

Off-road Equipment -

Demolition -

Architectural Coating - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Sunny Sands Construction - Phase 2-3 - Riverside-Salton Sea County, Summer

**EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Not Applied**

Vehicle Trips - Construction only.

Construction Off-road Equipment Mitigation - Per SCAQMD Rule 403 Fugitive Dust requirements.

Area Mitigation - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Project Characteristics -

Land Use - Phase 2-3 construction area is approximately 2.6 acres.

Construction Phase - Construction schedule per Schematic Design Submittal (November 2021).

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment - Limited equipment for MPR renovation.

Off-road Equipment -

Demolition -

Architectural Coating - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Sunny Sands Construction - Phase 2-3 - Riverside-Salton Sea County, Winter

**EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Not Applied**

Vehicle Trips - Construction only.

Construction Off-road Equipment Mitigation - Per SCAQMD Rule 403 Fugitive Dust requirements.

Area Mitigation - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

**APPENDIX B.3**

**JWC Findings Letter**

JAMES W. CORNETT  
ECOLOGICAL CONSULTANTS  
(760) 320-8135

February 3, 2021

Julie Arthur  
Executive Director of Facilities Planning & Development  
Palm Springs Unified School District  
150 District Center Drive  
Palm Springs, California 92264

Dear Ms. Arthur:

On February 1, 2021, JWC Ecological Consultants conducted reconnaissance-level biological resource surveys at the Landau and Sunny Sands elementary school sites located in Cathedral City, Riverside County, California. The purpose of the surveys was to determine the likelihood that significant biological resources—sensitive or listed plant and animal species or sensitive habitats—were present on, or immediately adjacent to, the existing school sites. Such an evaluation was necessary as we understand the District intends to relocate, renovate, remove, or install classroom and associated facilities within the school site boundaries. In addition to the field surveys, we reviewed the available literature sources dealing with sensitive species presence in the region.

We found both school sites to be fully developed with buildings, playgrounds and regularly maintained lawns and landscaped areas covering the entire site. No natural and native plant communities existed within the school site boundaries. For these reasons, **we see no need or requirement to conduct comprehensive CEQA-level biological resource analyses on either site.**

However, as both school sites contain open, exposed lawn areas that are not used every day of the week by students or school staff, **we do recommend pre-construction burrowing owl surveys.** These surveys should be undertaken between 14 and 30 days prior to any kind of ground disturbance related to modifications to your facilities and properties. We recommend the surveys because burrowing owls can take up residence on open, exposed landscapes, whether natural or artificial, at any time. The expansive lawns of both school sites meet these criteria. The burrowing owl is a fully state and federally protected species under the Migratory Bird Treaty Act.

Please do not hesitate to contact me should you have any questions regarding our findings.

Sincerely,

  
James W. Cornett  
Jwc/tb

**APPENDIX B.4**

**Analysis of Protected Bird Species**

## ANALYSIS OF PROTECTED BIRD SPECIES

The Cornell Lab of Ornithology reference was reviewed for each of the following bird species that may have potential for occurring to assess the potential for impacts.<sup>1</sup>

**Coastal California gnatcatcher** - The coastal California gnatcatcher (*Polioptila californica*) is a federally listed threatened species. The Project Site is developed and it is unlikely to see this species within the Project area since the coastal California gnatcatcher prefer coastal sagescrub habitat which does not exist on or near the school site; the landscaped area does not meet the criteria for potential coastal California gnatcatcher habitat. No coastal California gnatcatcher have been observed on the Project Site.

There would be no impacts to coastal California gnatcatcher habitat.

**Swainson's hawk** - The Swainson's hawk (*Buteo swainsoni*) is a State listed threatened species. The Project Site is developed and it is unlikely to see this species within the area. Although no natural and native plant communities exist within the Project Site boundaries, the potential still exists for Swainson's hawk to occur. The landscaped area of the Project Site including tall trees such as palms and eucalyptus meet the criteria for potential Swainson's hawk habitat. No Swainson's hawk have been observed on the Project Site; however, Swainson's hawk can take up residence in tall trees such as palms or eucalyptus, at any time. Demolition, construction, and other exterior modifications resulting from the Proposed Project have the potential to disturb habitat for Swainson's hawk.

Impacts are potentially significant.

**Little Willow Flycatcher** - The Little Willow Flycatcher (*Empidonax traillii brewsteri*) is a State listed Endangered species. The Project Site is developed and it is unlikely to see this species within the Project area since the Little Willow Flycatcher prefer riparian habitat which does not exist on or near the school site. No Little Willow Flycatcher have been observed on the school site. The landscaped area of the school site does not meet the criteria for potential Little Willow Flycatcher habitat.

There would be no impacts to the Little Willow Flycatcher habitat with implementation of the Project.

**Southwestern willow flycatcher** - The Southwestern willow flycatcher (*Empidonax traillii extimus*) is a federally and State listed endangered species. The Project Site is developed and it is unlikely to see this species within the Proposed Project area since the Southwestern willow flycatcher prefer riparian habitat which does not exist on or near the school site. No Southwestern willow flycatcher have been observed on the school site. The landscaped area of the school site does not meet the criteria for potential Little Willow Flycatcher habitat.

---

<sup>1</sup> The Cornell Lab of Ornithology, <https://www.allaboutbirds.org/news/>. Accessed March 2022.

There would be no impacts to the Southwestern willow flycatcher habitat with implementation of the Project.

**Least Bell's vireo** - The Least Bell's vireo (*Vireo bellii pusillus*) is a federally and State listed endangered species. The Project Site is developed and it is unlikely to see this species within the Project area since the Least Bell's vireo prefer riparian habitat which does not exist on or near the school site. No Least Bell's vireo have been observed on the school site. The landscape area of the school site does not meet the criteria for potential Least Bell's vireo habitat.

There would be no impacts to the Least Bell's vireo habitat with implementation of the Project.

**Burrowing Owl** -The Project Site and adjacent recreational field have potential habitat for burrowing owls. The burrowing owl (*Athene cunicularia*) is a species of special concern. The school site contains open, exposed lawn areas that are not used every day of the week by students or school staff. Although no natural and native plant communities exist within the school site boundaries, the potential still exists for burrowing owls to occur on-site. No burrowing owls have been observed on the school site. However, burrowing owls can take up residence on open, exposed landscapes, whether natural or artificial, at any time. The expansive lawn and landscape area of the school site meet the criteria for potential burrowing owl habitat. Demolition, construction, and other exterior modifications on the school site have the potential to disturb habitat for burrowing owls.

Impacts are potentially significant.

**Cooper's hawk** - The Cooper's hawk (*Accipiter cooperii*) is listed as a watch list species. The Project Site is developed and it is unlikely to see this species within the Project area. However, since birds have the ability to migrate from different areas there is the potential to encounter this species on-site. Although no natural and native plant communities exist within the school site boundaries the potential still exists for Cooper's hawk to occur on-site. No Cooper's hawk have been observed on the school site. However, Cooper's hawk can take up residence in tall trees such as palms or eucalyptus, at any time. The landscape area of the school site meet the criteria for potential Cooper's hawk habitat. Demolition, construction, and other exterior modifications on the school site have the potential to disturb habitat for Cooper's hawk.

Impacts are potentially significant.

**Sharp-shinned hawk** - The sharp-shinned hawk (*Accipiter striatus*) is listed as a watch list species. The Project Site is developed and it is unlikely to see this species within the Project area. However, since birds have the ability to migrate from different areas there is the potential to encounter this species on-site. Although no natural and native plant communities exist within the school site boundaries the potential still exists for sharp-shinned hawk to occur on-site. No sharp-shinned hawk have been observed on the school site. However, sharp-shinned hawk can take up residence in tall trees such as palms or eucalyptus, at any time. The landscape area of the school site meet the criteria for potential sharp-

shinned hawk habitat. Demolition, construction, and other exterior modifications on the school site have the potential to disturb habitat for sharp-shinned hawk.

Impacts are potentially significant.

**Southern California rufous-crowned sparrow** - The Southern California rufous-crowned sparrow (*Aimophila ruficeps canescens*) is a watch list species. The Project Site is developed and it is unlikely to see this species within the Project area since the Southern California rufous-crowned sparrow prefers coastal-bluff or coastal sage scrub habitat which does not exist on or near the school site. No Southern California rufous-crowned sparrow have been observed on the school site. The landscape area of the school site does not meet the criteria for potential Southern California rufous-crowned sparrow habitat.

There would be no impacts to the Southern California rufous-crowned sparrow habitat.

**Golden eagle** - The golden eagle (*Aquila chrysaetos*) is a fully protected species. The Project Site is developed and it is unlikely to see this species within the Project area. Although no natural and native plant communities exist within the school site boundaries the potential still exists for golden eagle to occur on-site. No golden eagle have been observed on the school site. However, golden eagle can take up residence in tall trees such as palms or eucalyptus, at any time. The landscape area of the school site meets the criteria for potential golden eagle habitat. Demolition, construction, and other exterior modifications on the school site have the potential to disturb habitat for golden eagle.

Impacts are potentially significant.

**Bell's sage sparrow** - The Bell's sage sparrow (*Artemisiospiza belli belli*) is a watch list species. The Project Site is developed, and it is unlikely to see this species within the Project area since the Bell's sage sparrow prefer coastal sagebrush, chaparral, and other open, scrubby habitats. No Bell's sage sparrow have been observed on the school site. The landscape area of the school site does not meet the criteria for potential Bell's sage sparrow habitat.

There would be no impacts to the Bell's sage sparrow habitat with implementation of the Project.

**Long-eared owl** - The long-eared owl (*Asio otus*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area. However, since birds have the ability to migrate from different areas there is the potential to encounter this species on-site. Although no natural and native plant communities exist within the school site boundaries the potential still exists for long-eared owl to occur on-site. No long-eared owl have been observed on the school site. However, long-eared owl can take up residence in tall trees such as palms or eucalyptus, at any time. The landscape area of the school site meets the criteria for potential long-eared owl habitat. Demolition, construction, and other exterior modifications on the school site have the potential to disturb habitat for long-eared owl.

Impacts are potentially significant.

**Redhead** - The Redhead (*Aythya americana*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the Redhead prefers wetland habitat. No Redhead have been observed on the school site. The landscape area of the school site does not meet the criteria for potential Redhead habitat.

There would be no impacts to the Redhead habitat with implementation of the Project.

**Vaux's swift** - The Vaux's swift (*Chaetura vauxi*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the Vaux's swift prefer old growth, coniferous forests to nest. No Vaux's swift has been observed on the school site. The landscape area of the school site does not meet the criteria for potential Vaux's swift habitat.

There would be no impacts to the Vaux's swift habitat with implementation of the Project.

**Northern harrier** - The northern harrier (*Circus hudsonius*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since no natural and native plant communities exist within the school site boundaries. The landscape area of the school site does not meet the criteria for potential northern harrier habitat.

There would be no impacts to the northern harrier habitat with implementation of the Project.

**Olive-sided flycatcher** - The olive-sided flycatcher (*Contopus cooperi*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the olive-sided flycatcher prefer habitat near pine forests or water sources. No olive-sided flycatcher have been observed on the school site. The landscape area of the school site does not meet the criteria for potential olive-sided flycatcher habitat.

There would be no impacts to the olive-sided flycatcher habitat with implementation of the Project.

**Black swift** - The black swift (*Cypseloides niger*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the black swift prefer to nest on cliff ledges behind or near waterfalls. No black swift have been observed on the school site. The landscape area of the school site does not meet the criteria for potential black swift habitat.

There would be no impacts to the black swift habitat with implementation of the Project.

**California horned lark** - The California horned lark (*Eremophila alpestris actia*) is a watch list species. The Project Site is developed, and it is unlikely to see this species within the Project area. However, since birds have the ability to migrate from different areas there is the potential to encounter this species on-site. Although no natural and native plant communities exist within the school site boundaries the potential still exists for California horned lark to occur on-site. No California horned lark have been

observed on the school site. However, California horned lark can take up residence in areas of sparse vegetation and areas cleared by humans, such as plowed fields and mowed expanses, at any time. The landscape area of the school site meet the criteria for potential California horned lark habitat. Demolition, construction, and other exterior modifications on the school site have the potential to disturb habitat for California horned lark.

Impacts are potentially significant.

**Prairie falcon** - The prairie falcon (*Falco mexicanus*) is a watch list species. The Project Site is developed, and it is unlikely to see this species within the Project area. However, since birds have the ability to migrate from different areas there is the potential to encounter this species on-site. Although no natural and native plant communities exist within the school site boundaries the potential still exists for prairie falcon to occur on-site. No prairie falcon have been observed on the school site. However, prairie falcon can take up residence in grasslands, shrubsteppe desert, and areas of mixed shrubs, at any time. The landscape area of the school site meet the criteria for potential prairie falcon habitat. Demolition, construction, and other exterior modifications on the school site have the potential to disturb habitat for prairie falcon.

Impacts are potentially significant.

**American peregrine falcon** - The American peregrine falcon (*Falco peregrinus anatum*) is a fully protected species. The Project Site is developed, and it is unlikely to see this species within the Project area since the American peregrine falcon prefer higher elevations such as cliffs for nesting and are most likely to occur near the coast or other water sources. No American peregrine falcon have been observed on the school site. The landscape area of the school site does not meet the criteria for potential American peregrine falcon habitat.

There would be no impacts to the American peregrine falcon habitat with implementation of the Project.

**Common loon**- The common loon (*Gavia immer*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the common loon prefers habitat near lakes and estuaries. No common loon have been observed on the school site. The landscape area of the school site does not meet the criteria for potential common loon habitat.

There would be no impacts to the common loon habitat with implementation of the Project.

**Yellow-breasted chat** - The yellow-breasted chat (*Icteria virens*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the yellow-breasted chat prefers shrubby habitats along rivers. No yellow-breasted chat have been observed on the school site. The landscape area of the school site does not meet the criteria for potential yellow-breasted chat habitat.

There would be no impacts to the yellow-breasted chat habitat with implementation of the Project.

**Loggerhead shrike** - The Loggerhead shrike (*Lanius ludovicianus*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area. However, since birds have the ability to migrate from different areas there is the potential to encounter this species on-site. Although no natural and native plant communities exist within the school site boundaries the potential still exists for Loggerhead shrike to occur on-site. No Loggerhead shrike have been observed on the school site. However, Loggerhead shrike can take up residence in desert scrublands, savannas, prairies, golf courses, and cemeteries, at any time. The landscape area of the school site meets the criteria for potential Loggerhead shrike habitat. Demolition, construction, and other exterior modifications on the school site have the potential to disturb habitat for Loggerhead shrike.

Impacts are potentially significant.

**California gull** - The California gull (*Larus californicus*) is a watch list species. The Project Site is developed, and it is unlikely to see this species within the Project area since the California gull prefer habitat near water sources such as coastal areas and near lakes or rivers. No California gull have been observed on the school site. The landscape area of the school site does not meet the criteria for potential California gull habitat.

There would be no impacts to California gull habitat with implementation of the Project.

**Lucy's warbler** - The Lucy's warbler (*Leiothlypis luciae*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the Lucy's warbler prefer mesquite woodlands or scrubby areas near water sources. No Lucy's warbler have been observed on the school site. The landscape area of the school site does not meet the criteria for potential Lucy's warbler habitat.

There would be no impacts to Lucy's warbler habitat with implementation of the Project.

**Osprey** - The Osprey (*Pandion haliaetus*) is a watch list species. The Project Site is developed, and it is unlikely to see this species within the Project area since Osprey prefer shallow, fish-filled water, including rivers, lakes, reservoirs, lagoons, swamps, and marshes. No Osprey have been observed on the school site. The landscape area of the school site does not meet the criteria for potential Osprey habitat.

There would be no impacts to Osprey habitat with implementation of the Project.

**Bryant's savannah sparrow** - The Bryant's savannah sparrow (*Passerculus sandwichensis alaudinus*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since Bryant's savannah sparrow prefer grasslands with few trees, including meadows, pastures, grassy roadsides, sedge wetlands, and cultivated fields. No Bryant's savannah sparrow have

been observed on the school site. The landscape area of the school site does not meet the criteria for potential Bryant's savannah sparrow habitat.

There would be no impacts to Bryant's savannah sparrow habitat with implementation of the Project.

**Large-billed savannah sparrow** - The large-billed savannah sparrow (*Passerculus sandwichensis rostratus*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the large-billed savannah sparrow prefer grasslands with few trees, including meadows, pastures, grassy roadsides, western salt marshes, and cultivated fields. No large-billed savannah sparrow have been observed on the school site. The landscape area of the school site meet the criteria for potential large-billed savannah sparrow habitat.

There would no impacts to large-billed savannah sparrow habitat with implementation of the Project.

**Double-crested cormorant** - The double-crested cormorant (*Phalacrocorax auritus*) is a double-crested cormorant species. The Project Site is developed, and it is unlikely to see this species within the Project area since the double-crested cormorant prefer large bodies of water such as lakes and estuaries. No double-crested cormorant have been observed on the school site. The landscape area of the school site does not meet the criteria for potential double-crested cormorant habitat.

There would be no impacts to double-crested cormorant habitat with implementation of the Project.

**Summer tanager** - The summer tanager (*Piranga rubra*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the summer tanager prefer low-elevation willow and cottonwood woodlands, and in higher-elevation mesquite and salt cedar stands. No summer tanager have been observed on the school site. The landscape area of the school site does not meet the criteria for potential summer tanager habitat.

There would be no impacts to summer tanager habitat with implementation of the Project.

**Black-tailed gnatcatcher** - The black-tailed gnatcatcher (*Polioptila melanura*) is a watch list species. The Project Site is developed, and it is unlikely to see this species within the Project area. However, since birds have the ability to migrate from different areas there is the potential to encounter this species on-site. Although no natural and native plant communities exist within the school site boundaries the potential still exists for black-tailed gnatcatcher to occur on-site. No black-tailed gnatcatcher have been observed on the school site. However, black-tailed gnatcatcher can take up residence in semiarid areas with desert thorn scrub, at any time. The landscape surrounding the area of the school site meet the criteria for potential black-tailed gnatcatcher habitat. Demolition, construction, and other exterior modifications on the school site have the potential to disturb habitat for black-tailed gnatcatcher.

Impacts are potentially significant.

**Purple martin** - The purple martin (*Progne subis*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the purple martin prefer nesting within urban cities and do not reside within desert habitat. No purple martin have been observed on the school site. The landscape area of the school site does not meet the criteria for potential purple martin habitat.

There would be no impacts to purple martin habitat with implementation of the Project.

**Vermilion flycatcher** - The Vermilion flycatcher (*Pyrocephalus rubinus*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the Vermilion flycatcher prefer stream corridors within the scrub ecosystem. No Vermilion flycatcher have been observed on the school site. The landscape area of the school site meet the criteria for potential Vermilion flycatcher habitat.

There would be no impacts to the Vermilion flycatcher habitat with implementation of the Project.

**Yellow warbler** - The yellow warbler (*Setophaga petechia*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the yellow warbler prefers mangrove forests, dry scrub, marshes, and forests. No yellow warbler have been observed on the school site. The landscape area of the school site does not meet the criteria for potential yellow warbler habitat.

There would be no impacts to yellow warbler habitat with implementation of the Project.

**Crissal thrasher** - The Crissal thrasher (*Toxostoma crissale*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area. However, since birds have the ability to migrate from different areas there is the potential to encounter this species on-site. Although no natural and native plant communities exist within the school site boundaries the potential still exists for Crissal thrasher to occur on-site. No Crissal thrasher have been observed on the school site. However, Crissal thrasher can take up residence in dense, low scrubby vegetation, such as desert and foothill scrub, at any time. The surrounding area of the school site meets the criteria for potential Crissal thrasher habitat. Demolition, construction, and other exterior modifications on the school site have the potential to disturb habitat for Crissal thrasher.

Impacts are potentially significant.

**Le Conte's thrasher** - The Le Conte's thrasher (*Toxostoma lecontei*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area. However, since birds have the ability to migrate from different areas there is the potential to encounter this species on-site. Although no natural and native plant communities exist within the school site boundaries the potential still exists for Le Conte's thrasher to occur on-site. No Le Conte's thrasher have been observed on the school site. However, Le Conte's thrasher can take up residence in low, sandy, open deserts, at

any time. The surrounding area of the school site meet the criteria for potential Le Conte's thrasher habitat. Demolition, construction, and other exterior modifications on the school site have the potential to disturb habitat for Le Conte's thrasher.

Impacts are potentially significant.

**Yellow-headed blackbird** - The yellow-headed blackbird (*Xanthocephalus xanthocephalus*) is a species of special concern. The Project Site is developed, and it is unlikely to see this species within the Project area since the yellow-headed blackbird prefers wetland habitat and crop fields for foraging. No yellow-headed blackbird have been observed on the school site. The landscape area of the school site does not meet the criteria for potential yellow-headed blackbird habitat.

There would be no impacts to the yellow-headed blackbird habitat with implementation of the Project Site.

**Cultural Resources Background Data**

**APPENDIX C.1**

**Cultural Resources Search Memo**

February 26, 2021

Christine Lan  
Senior Project Manager  
Meridian Consultants, LLC  
706 S. Hill Street, 11th Floor  
Los Angeles, CA 90014  
Transmitted via email to [CLan@meridianconsultantsllc.com](mailto:CLan@meridianconsultantsllc.com)

**RE: Cultural Resource Inventory for the Palm Springs Unified School District Modernization Project: Sunny Sands Elementary School, Riverside County, California**

Dear Ms. Lan:

At the request of Meridian Consultants, LLC, PaleoWest, LLC (PaleoWest) conducted a cultural resource inventory for the Palm Springs Unified School District (PSUSD) Modernization Project: Sunny Sands Elementary School, Riverside County, California. The cultural resource inventory was limited to a cultural resource literature review and records search of the California Historic Resource Information System (CHRIS) and a review of the Sacred Lands File (SLF) by the Native American Heritage Commission (NAHC). This memorandum summarizes the results of the cultural resource inventory efforts for the Project.

The literature review and records search was conducted on February 16, 2021 by Eulices Lopez, Administrative/Coordinator Assistant at the Eastern Information Center (EIC) housed at University of California, Riverside. The records search included the 11-acre Project area as well as a half-mile (0.5 mile) radius. The purpose of the records search was to identify any known cultural resources within the immediate vicinity of the Project area. The records search also included a review of the Office of Historic Preservation Archaeological Determination of Eligibility and the Office of Historic Preservation Directory of Historic Properties Data File.

The records search indicated that five previous studies have been conducted within a half mile of the Project area (Table 1). None of these studies included or intersected the Project area. As a result of the records search, no cultural resources were identified within the records search area. Additionally, a review of historic topographic maps and aerial photographs did not indicate any structures on the property prior to 1981.

RI-07758	2008	Tang, Bai "Tom"	Historic and Archaeological Property Survey Report (District: 08, RIV-CTH/ PLHL, PM 5430, EA: Ramon Road)
RI-10838	2010	Bonner, Diane F.	Cultural Resources Record Search and Archaeological Survey Results for the Proposed Royal Street Communications, California, LLC, Site LA3615A (Cathedral City Soccer Park) located at 69400 30th Avenue, Cathedral City, Riverside County, California 92234

PaleoWest contacted the NAHC for a review of the SLF on January 22, 2021. The objective of the SLF search was to determine if the NAHC had any knowledge of Native American cultural resources (e.g., traditional use or gathering area, place of religious or sacred activity, etc.) within the immediate vicinity of the Project area. The NAHC responded on February 8, 2021, stating that the SLF was completed with negative results; however, the NAHC recommended that 16 Native American individuals representing 11 tribal groups be contacted to elicit information regarding cultural resource issues related to the proposed Project (see Exhibit A for a copy of the response letter received from the NAHC).

It has been a pleasure working with you on this Project. If you have any questions, please do not hesitate to contact me at [rthomas@paleowest.com](mailto:rthomas@paleowest.com).

Sincerely,

**Roberta Thomas, M.A., RPA | Senior Archaeologist/Project Manager**

## NATIVE AMERICAN HERITAGE COMMISSION

February 8, 2021

Roberta Thomas  
PaleoWest ArchaeologyVia Email to: [rthomas@paleowest.com](mailto:rthomas@paleowest.com)

Re: PSUSD Modernization (21-0058) – Sunny Sands Elementary School Project, Riverside County

Dear Ms. Thomas:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: [Andrew.Green@nahc.ca.gov](mailto:Andrew.Green@nahc.ca.gov).

Sincerely,

Andrew Green  
Cultural Resources Analyst

---

Hi Julie;

First – thank you for your Freudian slip of calling the plaques at the schools with Wexler classrooms “plagues”. I know how you love the Wexler buildings. 😊

Second – Under CEQA, a property is investigated for its potential to be considered a historic resource when it “attains sufficient age” to be evaluated for significance. “Sufficient age” generally means 50 years of age, and that is to follow the guidelines of listing a property in the National Register of Historic Places. But the “sufficient age” guideline means that a property could be evaluated as a “property achieving significance within the past 50 years if it is of exceptional importance” (Criteria consideration “g.” of the National Register Criteria for Evaluation.)

When the National Register uses the term “exceptional importance” it means that a property like the Walt Disney Concert Hall, or the Sundial Bridge in Redding, CA, can be considered for listing in the NR even though it isn’t 50 years old.

So, your elementary school buildings definitely don’t meet the 50 year mark, and I’m pretty sure they aren’t of the architectural importance of those mentioned above or of the Rock and Roll Hall of Fame (1985-97) in Cleveland, OH (designed by I.M. Pei).

Just because a building is designed by a master architect, unless the design is worthy of being saved as an outstanding example of Wexler’s work, it would have to be at the level of a Frank Gehry or I.M. Pei modernist creation.

I don’t believe you need to have the buildings evaluated. The CEQA Checklist asks: Will the project cause a substantial adverse change in the significance of a historical resource?

And the CEQA & Historical Resources Technical Advice Series says “the local agency should employ recognized criteria to determine whether a previously unrecognized significant historical resource exists”. The “sufficient age” and “lack of exceptional importance” are recognized criteria.

The school buildings don’t meet the criteria to be investigated as historical resources due to age, and they don’t meet the criteria (C of NR, 3 of CR) to be considered exceptional examples of elementary school buildings.

I can prepare a cost estimate for a letter report – basically stating what I’ve said – but you may not need anything. I’d run this by your CEQA/planning consultants and see what they recommend.

I totally understand your being concerned having Wexler buildings in your project.

--Pam

**1.3 User Entered Comments & Non-Default Data**

Project Characteristics -

Land Use - Phase 1 construction area is approximately 1.8 acres.

Construction Phase - Construction schedule per Schematic Design Submittal (November 2021).

Grading - Assumed up to 5,000 cy soil export.

Demolition -

Architectural Coating - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Vehicle Trips - Construction only.

Construction Off-road Equipment Mitigation - Per SCAQMD Rule 403 Fugitive Dust requirements.

Area Mitigation - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Sunny Sands Construction - Phase 1 - Riverside-Salton Sea County, Annual

Project Characteristics -

Land Use - Phase 2-3 construction area is approximately 2.6 acres.

Construction Phase - Construction schedule per Schematic Design Submittal (November 2021).

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Off-road Equipment - Limited equipment for MPR renovation.

Off-road Equipment -

Demolition -

Architectural Coating - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Sunny Sands Construction - Phase 2-3 - Riverside-Salton Sea County, Annual

**EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Not Applied**

Vehicle Trips - Construction only.

Construction Off-road Equipment Mitigation - Per SCAQMD Rule 403 Fugitive Dust requirements.

Area Mitigation - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Project Characteristics -

Land Use - Project site is 11.2 acres.

Construction Phase - Operation only.

Vehicle Trips - Student capacity is 1,279. Assumed 5,257 daily trips (4.11 trips per student per ITE Trip Generation Manual).

Area Coating - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Energy Use -

Area Mitigation - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Sunny Sands Operation - Existing to be Removed - Riverside-Salton Sea County, Annual

**1.3 User Entered Comments & Non-Default Data**

Project Characteristics -

Land Use - Project site is 11.2 acres.

Construction Phase - Operation only.

Vehicle Trips - Student capacity would remain 1,279. Assumed 5,257 daily trips (4.11 trips per student per ITE Trip Generation Manual).

Area Coating - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Area Mitigation - Consistent with SCAQMD Rule 1113 assumed VOC content of 50 grams per liter for architectural coatings.

Water Mitigation -

Sunny Sands Operation - Proposed Uses - Riverside-Salton Sea County, Annual

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/26/2020 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### ADDITIONAL ENVIRONMENTAL RECORDS

#### ***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
DJ AND CO TRUCKING EPA ID:: CAR000188722	69401 SHAWNEE CT	NE 0 - 1/8 (0.121 mi.)	2	12

INDIAN RESERV: This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

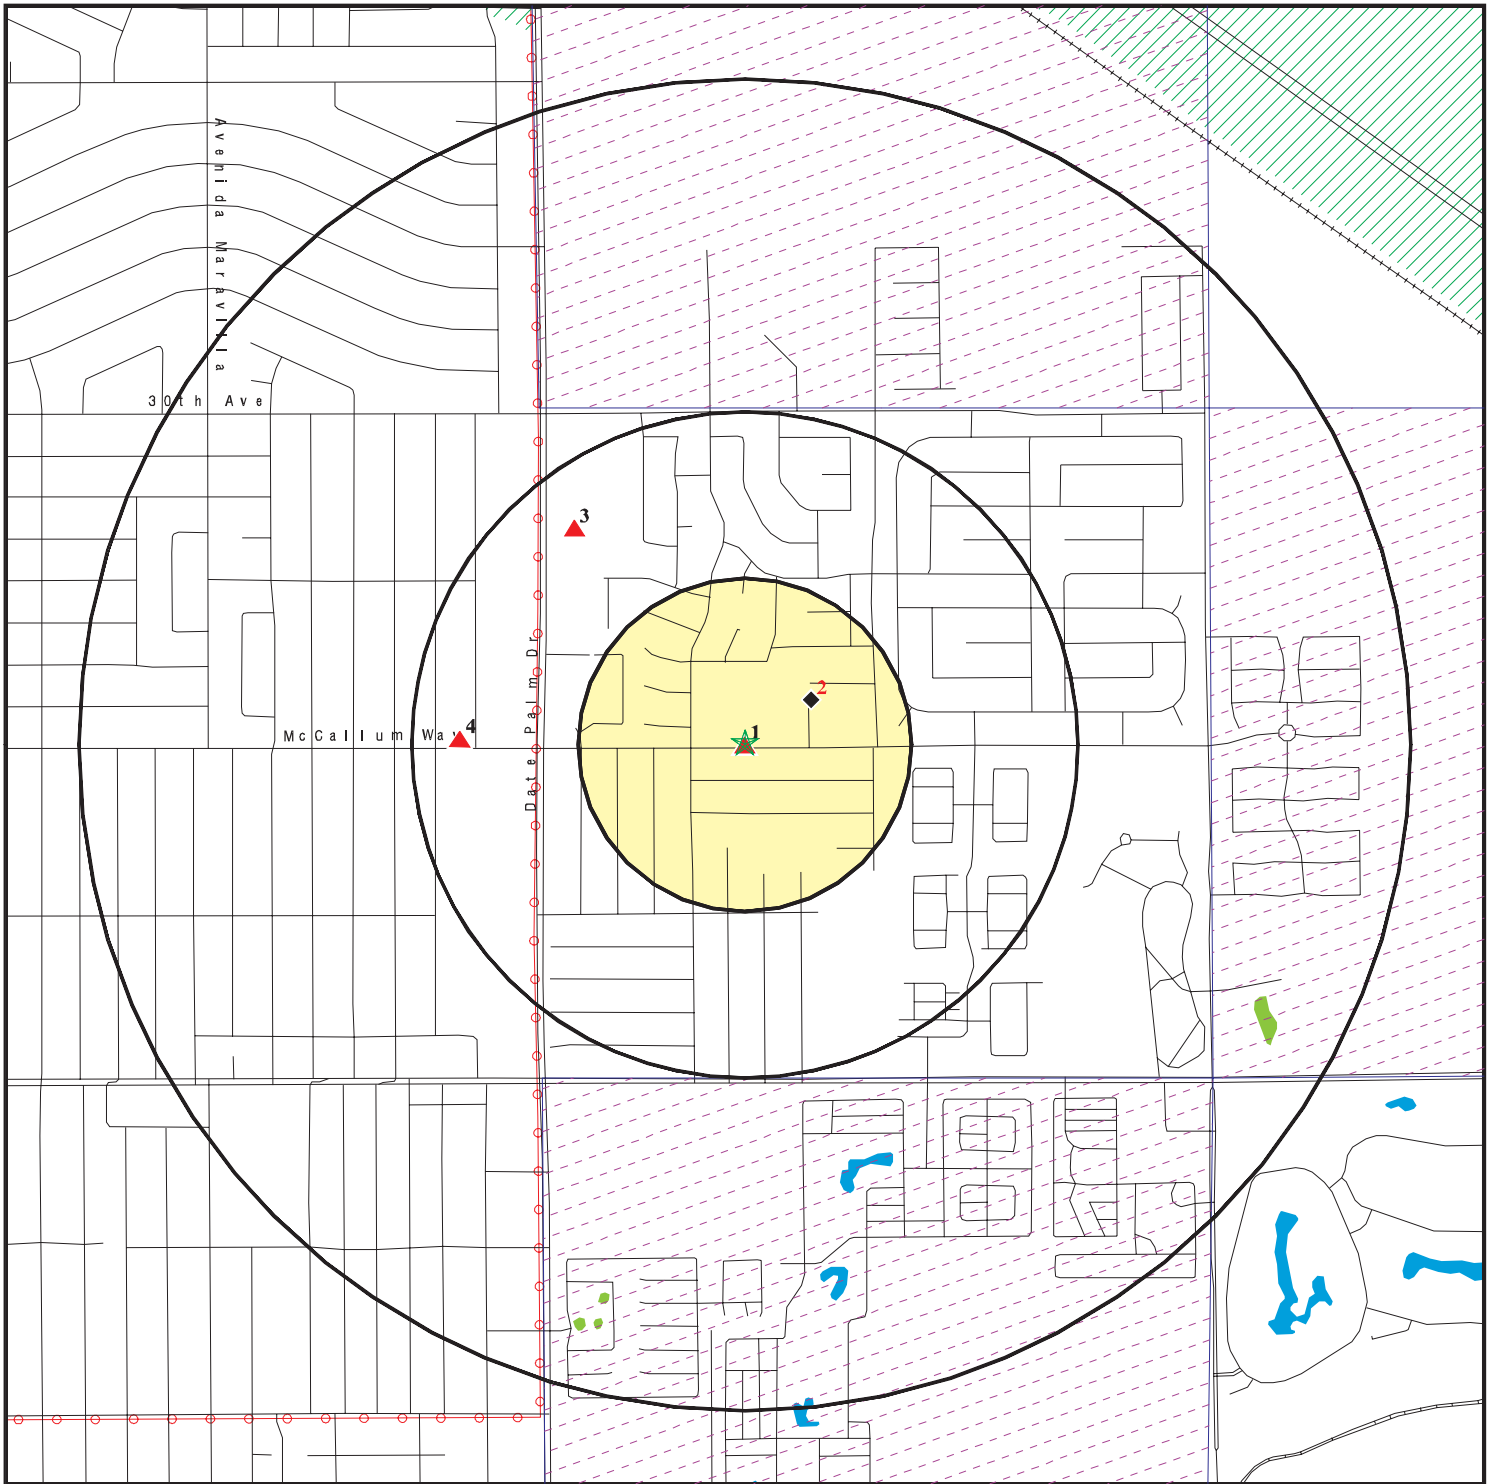

A review of the INDIAN RESERV list, as provided by EDR, and dated 12/31/2014 has revealed that there are 3 INDIAN RESERV sites within approximately 1 mile of the target property.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/28/2020

Telephone: 703-603-8704  
Last EDR Contact: 12/23/2020  
Next Scheduled EDR Contact: 04/12/2021  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/28/2020

Next Scheduled EDR Contact: 04/26/2021  
Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: 800-424-9346
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/26/2021
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/14/2020	Source: EPA
Date Data Arrived at EDR: 12/17/2020	Telephone: 800-424-9346
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/06/2020	Source: Department of the Navy
Date Data Arrived at EDR: 08/21/2020	Telephone: 843-820-7326
Date Made Active in Reports: 11/11/2020	Last EDR Contact: 11/05/2020
Number of Days to Update: 82	Next Scheduled EDR Contact: 02/22/2021
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695
Date Made Active in Reports: 11/18/2020	Last EDR Contact: 11/05/2020
Number of Days to Update: 13	Next Scheduled EDR Contact: 03/08/2021
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695
Date Made Active in Reports: 11/18/2020	Last EDR Contact: 11/05/2020
Number of Days to Update: 13	Next Scheduled EDR Contact: 03/08/2021
	Data Release Frequency: Varies

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/26/2020

### UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 09/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2020	Telephone: 202-566-2777

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### DEED: Deed Restriction Listing

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## **Records of Emergency Release Reports**

### **HMIRS: Hazardous Materials Information Reporting System**

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 09/20/2020	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 09/22/2020	Telephone: 202-366-4555
Date Made Active in Reports: 12/14/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 83	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

### **CHMIRS: California Hazardous Material Incident Report System**

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 09/30/2020	Source: Office of Emergency Services
Date Data Arrived at EDR: 10/19/2020	Telephone: 916-845-8400
Date Made Active in Reports: 01/07/2021	Last EDR Contact: 01/20/2021
Number of Days to Update: 80	Next Scheduled EDR Contact: 05/03/2021
	Data Release Frequency: Semi-Annually

### **LDS: Land Disposal Sites Listing (GEOTRACKER)**

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 09/08/2020	Source: State Water Quality Control Board
Date Data Arrived at EDR: 09/08/2020	Telephone: 866-480-1028
Date Made Active in Reports: 11/30/2020	Last EDR Contact: 12/04/2020
Number of Days to Update: 83	Next Scheduled EDR Contact: 03/22/2021
	Data Release Frequency: Quarterly

### **MCS: Military Cleanup Sites Listing (GEOTRACKER)**

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 09/08/2020	Source: State Water Resources Control Board
Date Data Arrived at EDR: 09/08/2020	Telephone: 866-480-1028
Date Made Active in Reports: 11/30/2020	Last EDR Contact: 12/04/2020
Number of Days to Update: 83	Next Scheduled EDR Contact: 03/22/2021
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch
Date Data Arrived at EDR: 01/03/2013	Telephone: N/A
Date Made Active in Reports: 02/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895

Number of Days to Update: 574	Next Scheduled EDR Contact: 04/19/2021
	Data Release Frequency: N/A

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Number of Days to Update: 83	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 11/02/2020
Number of Days to Update: 88	Next Scheduled EDR Contact: 02/15/2021
	Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/08/2018	Telephone: 703-308-4044

Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 04/15/2020	Telephone: 916-255-1136

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### **EDR MGP: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### **EDR Hist Auto: EDR Exclusive Historical Auto Stations**

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### **EDR Hist Cleaner: EDR Exclusive Historical Cleaners**

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

Date of Government Version: 04/30/2012	Source: Los Angeles County Department of Public Works

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 10/20/2020	Telephone: 860-424-3375
Date Made Active in Reports: 11/02/2020	Last EDR Contact: 11/09/2020

Such information has been reprinted with the permission of Endeavor Business Media.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

**APPENDIX H**

**Tribal Cultural Resources**

**APPENDIX H.1**

**AB 52 Tribal Consultation Notification Letters**

February 24, 2022

Ms. Lacy Padilla, Archaeological Technician  
Agua Caliente Band of Cahuilla Indians  
5401 Dinah Shore Drive  
Palm Springs, CA 92264

**SUBJECT:** Formal Notification for the Sunny Sands Elementary School Modernization Project.  
**Notification of Consultation Opportunity**, pursuant to Public Resources Code  
Section 21080.3.1

**PROJECT:** Sunny Sands Elementary School Modernization

Dear Ms. Padilla,

The Palm Springs Unified School District (PSUSD) has proposed the Sunny Sands Elementary School Modernization Project (Project) and is providing written notice to the Agua Caliente Band of Cahuilla Indians Tribe in response to the Tribe's request for the notification of projects proposed within the District.

The proposed modernization is for an approximately 11.2-acre existing elementary school campus within Cathedral City (City). Below please find the description of the proposed Project, maps showing the project location and vicinity, and the name of our project point of contact, pursuant to PRC Section 21080.3.1 (d).

**Project Location:** As shown in **Figure 1: Regional Location Map** and **Figure 2: Project Location Map**, the proposed Project is located at 69310 McCallum Way in the northern portion of the City. The campus is bound by Kemper Road to the north, residential developments to the east, McCallum Way to the south, and San Eljay Avenue to the west. Primary access to the campus is off of San Eljay Avenue. The Project Site is situated towards the western portion of the rectangular 11.2-acre lot. The Project Site is currently developed with an existing school campus.

**Project Description:** PSUSD launched a long-range facility master planning initiative in 2017 in order to ensure safe and well-maintained school facilities with optimal learning environments in support of its

academic mission. As a result of the draft report, Sunny Sands Elementary School was identified as one of the schools requiring comprehensive modernization upgrades. The majority of the classrooms are noted as either Category 3 – Fair; this category indicates that modernization, upgrades, replacements due to systems failures are a medium priority and should be scheduled in the future, or Category 1 – Excellent; this category indicates that the buildings are modern and upgrades due to systems failures are not a priority at this time. A couple of the portables are noted as Category 4 – Poor. This category notes that modernization, upgrades, and replacements due to systems failures are a high priority at this time; major systems are failing and should be scheduled in the future.

The campus also retains 18 portable classrooms, which would be replaced with a permanent classroom building with associated circulation, restrooms, and utility spaces.

The Project would involve demolition, new construction, building improvements and renovation, and hardscape improvements. Demolition of the portable facilities would take place at the school site to remove all portable structures. New construction of the permanent classroom buildings would take place towards the western portion of the school campus. Modernization of the multipurpose building would take place towards the southern edge of the campus. Hardscape improvement of the outdoor spaces will take place around the buildings, including the administrative building, multipurpose room, and classroom buildings on the school campus.

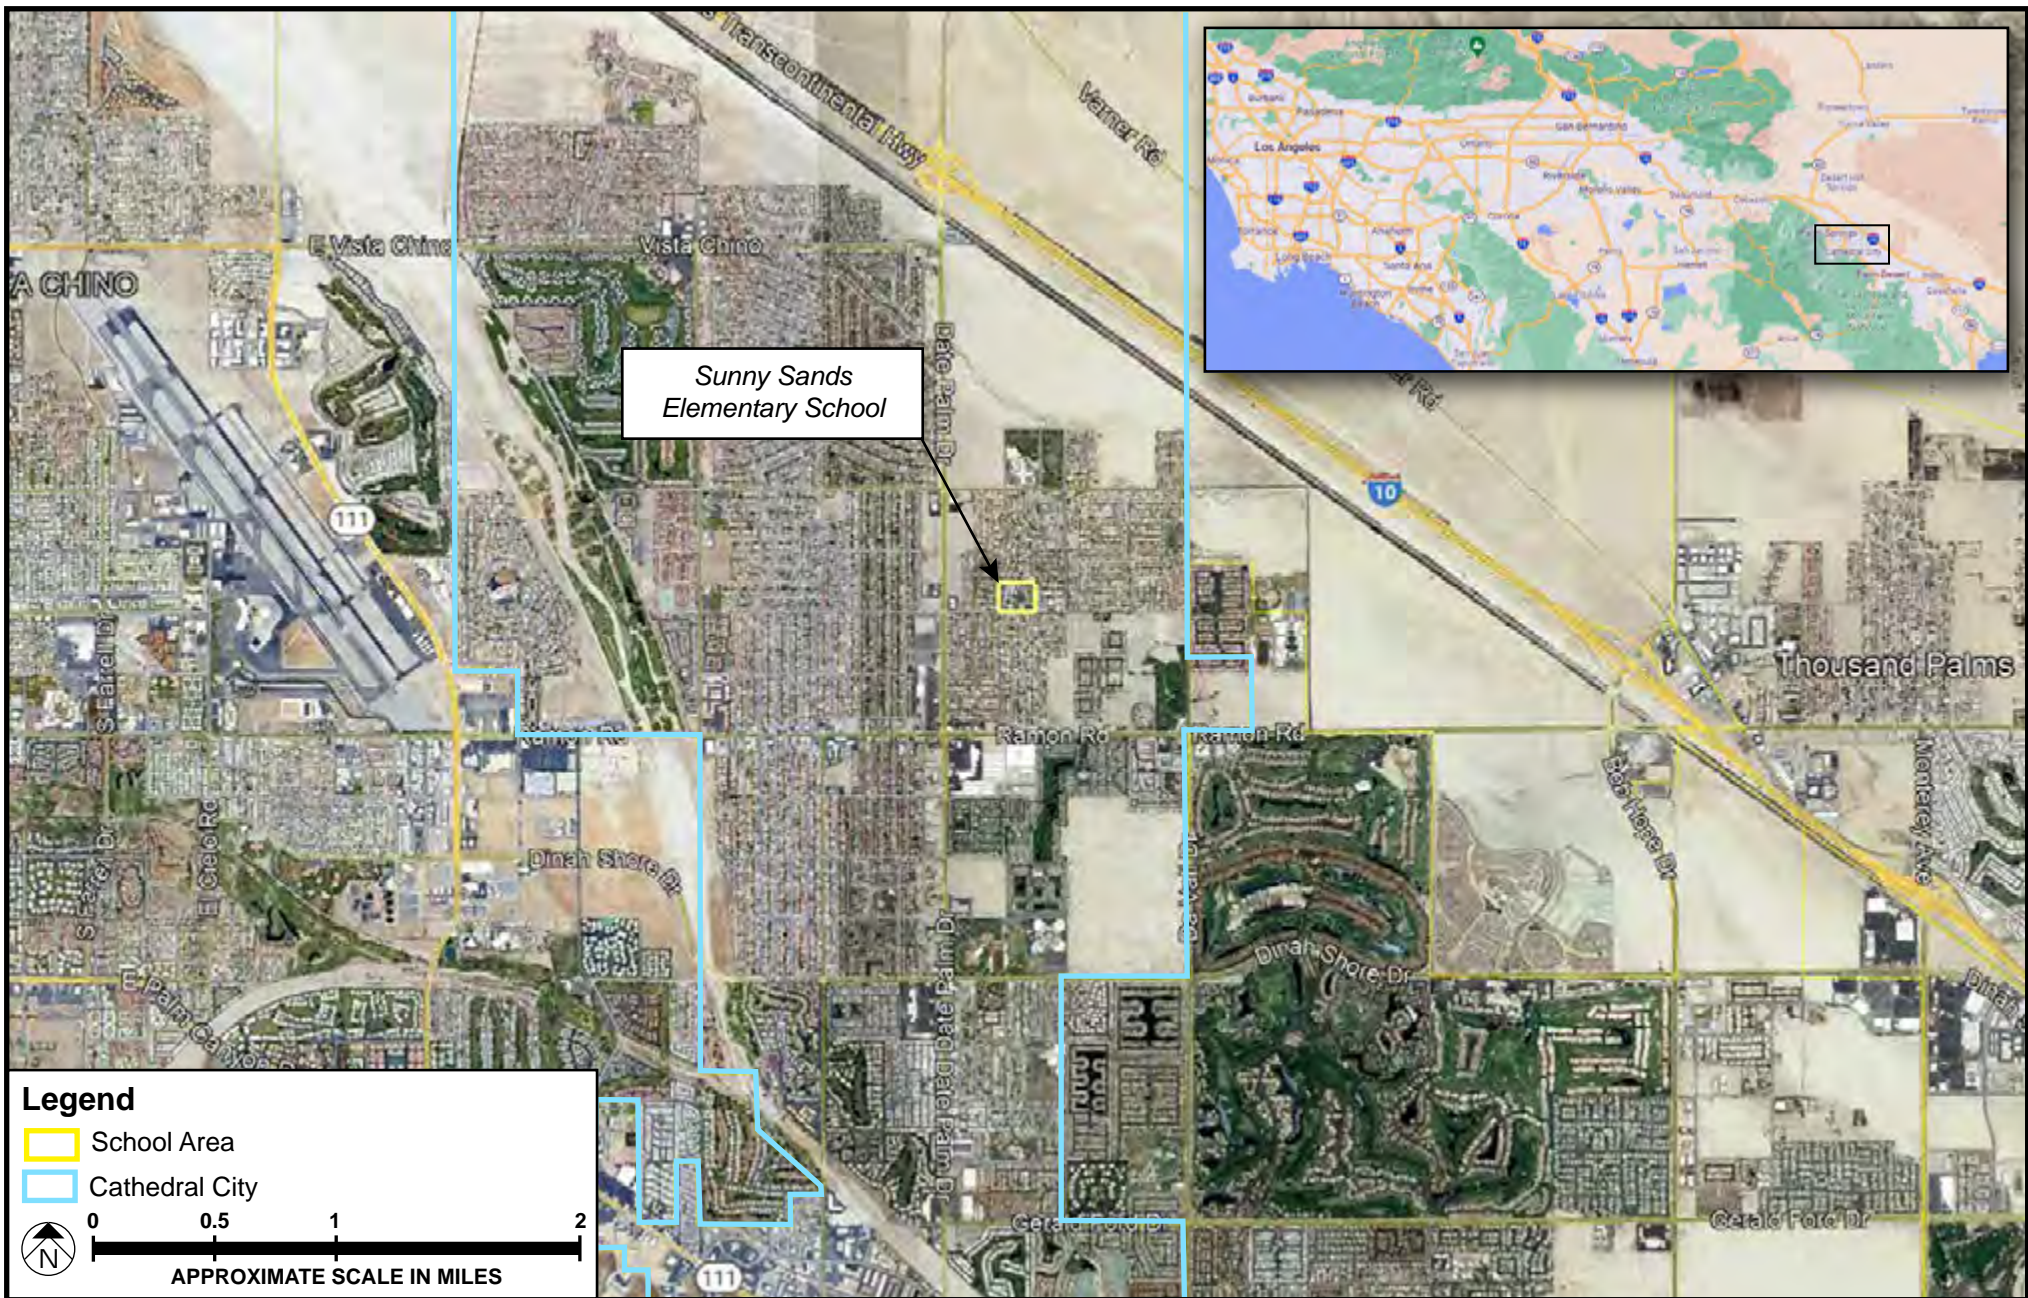

Under California State Law, the proposed Project is subject to the California Environmental Quality Act (CEQA). PSUSD is currently preparing an Initial Study to evaluate the proposed Project's potential environmental impacts. As part of this effort, and to ensure that any potential Tribal Cultural Resources (TCRs) defined in PRC Section 21074 (a) (1-2) that may be of concern are identified, pursuant to PRC Section 21080.3.1 (b), the Tribe has 30 days from the receipt of this letter to request consultation, in writing, with PSUSD.

If there are any additional questions, please contact Julie Arthur at (760) 883-2710 or by email at:

Thermal, CA 92274

**SUBJECT:** Formal Notification for the Sunny Sands Elementary School Modernization Project.  
**Notification of Consultation Opportunity**, pursuant to Public Resources Code Section 21080.3.1

**PROJECT:** Sunny Sands Elementary School Modernization

Dear Mr. Tortez, Jr.,

The Palm Springs Unified School District (PSUSD) has proposed the Sunny Sands Elementary School Modernization Project (Project) and is providing written notice to the Torres-Martinez Desert Cahuilla Indians Tribe in response to the Tribe's request for the notification of projects proposed within the District.

The proposed modernization is for an approximately 11.2-acre existing elementary school campus within Cathedral City (City). Below please find the description of the proposed Project, maps showing the project location and vicinity, and the name of our project point of contact, pursuant to PRC Section 21080.3.1 (d).

**Project Location:** As shown in **Figure 1: Regional Location Map** and **Figure 2: Project Location Map**, the proposed Project is located at 69310 McCallum Way in the northern portion of the City. The campus is bound by Kemper Road to the north, residential developments to the east, McCallum Way to the south, and San Eljay Avenue to the west. Primary access to the campus is off of San Eljay Avenue. The Project Site is situated towards the western portion of the rectangular 11.2-acre lot. The Project Site is currently developed with an existing school campus.

**Project Description:** PSUSD launched a long-range facility master planning initiative in 2017 in order to ensure safe and well-maintained school facilities with optimal learning environments in support of its academic mission. As a result of the draft report, Sunny Sands Elementary School was identified as one of

the schools requiring comprehensive modernization upgrades. The majority of the classrooms are noted as either Category 3 – Fair; this category indicates that modernization, upgrades, replacements due to systems failures are a medium priority and should be scheduled in the future, or Category 1 – Excellent; this category indicates that the buildings are modern and upgrades due to systems failures are not a priority at this time. A couple of the portables are noted as Category 4 – Poor. This category notes that modernization, upgrades, and replacements due to systems failures are a high priority at this time; major systems are failing and should be scheduled in the future.

The campus also retains 18 portable classrooms, which would be replaced with a permanent classroom building with associated circulation, restrooms, and utility spaces.

The Project would involve demolition, new construction, building improvements and renovation, and hardscape improvements. Demolition of the portable facilities would take place at the school site to remove all portable structures. New construction of the permanent classroom buildings would take place towards the western portion of the school campus. Modernization of the multipurpose building would take place towards the southern edge of the campus. Hardscape improvement of the outdoor spaces will take place around the buildings, including the administrative building, multipurpose room, and classroom buildings on the school campus.

Under California State Law, the proposed Project is subject to the California Environmental Quality Act (CEQA). PSUSD is currently preparing an Initial Study to evaluate the proposed Project's potential environmental impacts. As part of this effort, and to ensure that any potential Tribal Cultural Resources (TCRs) defined in PRC Section 21074 (a) (1-2) that may be of concern are identified, pursuant to PRC Section 21080.3.1 (b), the Tribe has 30 days from the receipt of this letter to request consultation, in writing, with PSUSD.

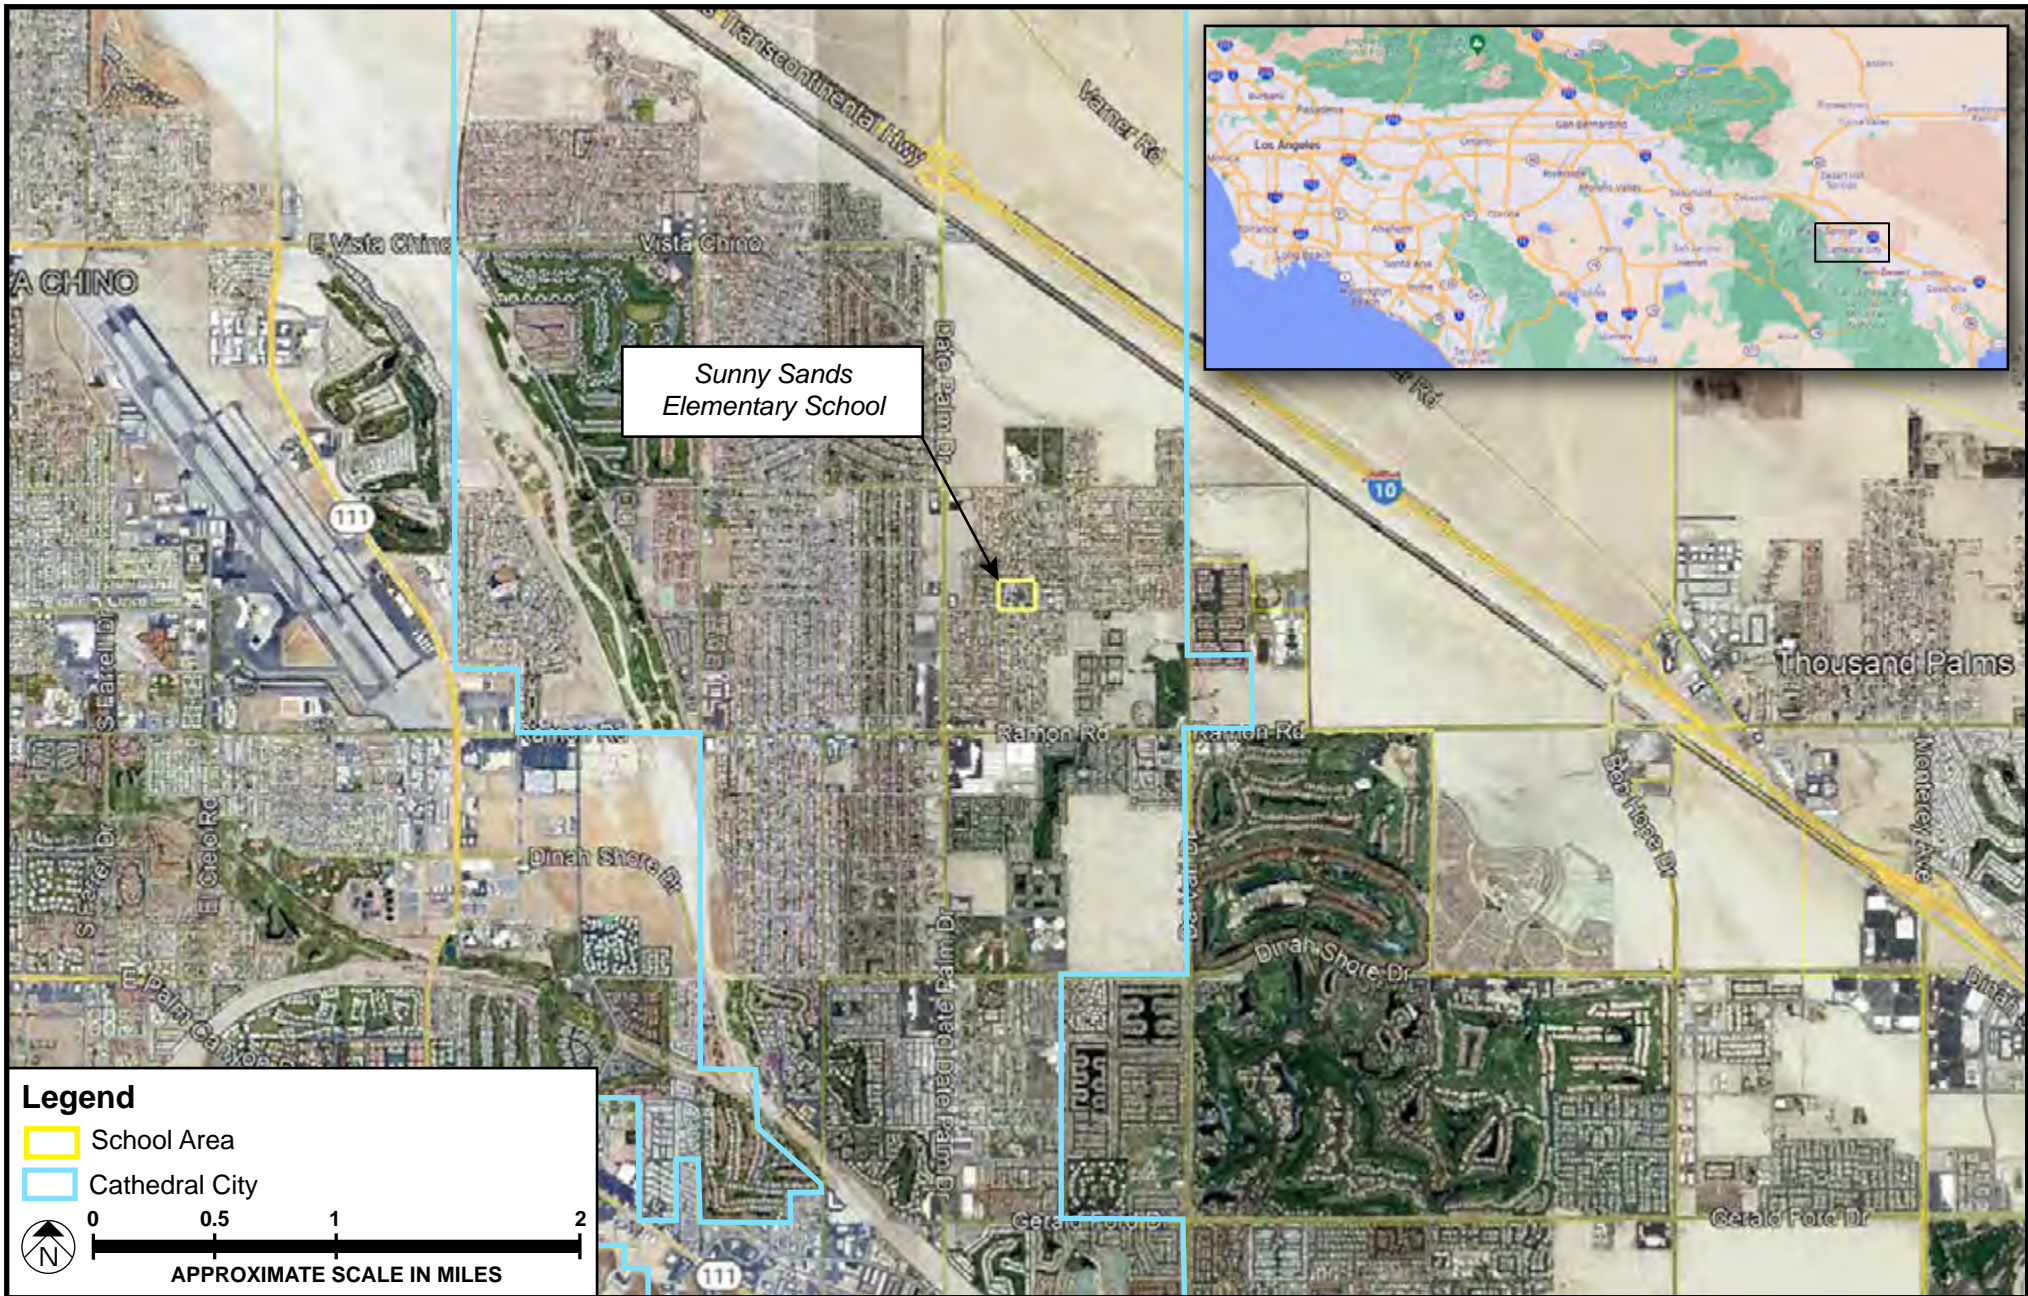

If there are any additional questions, please contact Julie Arthur at (760) 883-2710 or by email at: [jarthur@psusd.us](mailto:jarthur@psusd.us)

Regards,

**Re: Sunny Sands Elementary School Modernization Project**

Dear Ms. Julie Arthur,

The Agua Caliente Band of Cahuilla Indians (ACBCI) appreciates your efforts to include the Tribal Historic Preservation Office (THPO) in the Sunny Sands Elementary School Modernization project. The project area is not located within the boundaries of the ACBCI Reservation. However, it is within the Tribe's Traditional Use Area. For this reason, the ACBCI THPO requests the following:

\*Copies of any cultural resource documentation (report and site records) generated in connection with this project.

Again, the Agua Caliente appreciates your interest in our cultural heritage. If you have questions or require additional information, please call me at (760)699-6956. You may also email me at ACBCI-THPO@aguacaliente.net.

Cordially,

Lacy Padilla  
Archaeologist  
Tribal Historic Preservation Office  
AGUA CALIENTE BAND
